Department of Statistics, University of Dhaka 4th Year Undergraduate Program-2026

Project Group Distribution

Process of allocating students and faculties to groups:

There were a total of 90 students in the 4th year of the BS (Hons.) Program. With 21 faculty members available, 21 groups were formed. The students were first sorted in descending order according to their 2nd-year final CGPA. After sorting, the top 21 students were placed in Cluster 1, the next 21 in Cluster 2, the following 21 in Cluster 3, and the next 21 in Cluster 4. Finally, the remaining 6 students are allocated to Cluster 5.

Within each cluster, the students were randomly shuffled and assigned to the 21 groups, ensuring that each group received one student from each cluster. In addition, the remaining 6 students from Cluster 5 were randomly allocated to 21 groups. Finally, the 21 faculty members were randomly assigned to supervise the 21 groups. The randomization was performed using a random seed of 4 (Since this is a 4th year project distribution). Therefore, the grouping is fully reproducible, and running the code with the same seed will produce the identical allocation.

Group	Roll	Name	CGPA	Teacher
1.	5082	Farzana Yesmean Shantu	3.934	অধ্যাপক সায়েমা শারমিন
	5043	Uttom Kumar Barmon	3.726
